NURSING RESEARCH

INDEX TO VOLUME 12 WINTER, SPRING, SUMMER, FALL 1963

This index is in two parts; the first is an index to **Articles, Briefs, Research Reporter,** and **Researcher's Bookshelf** and the second is an index to the **Abstracts.** Both indexes are arranged alphabetically by author, subject and location of the institution or agency in which the study was made. That is, a study on the chronically ill, elderly patients at New York Hospital would have entries under the author, CHRONIC ILLNESS, GERIATRICS, and NEW YORK (CITY). The page number is indicated after each entry and in the **Abstract Index** it is immediately followed by the number of the abstract, for example, 58(S2). The following abbreviations are used: (ed)—editorial; (bk rev)—book review; (exc)—excerpt; (RR)—Research Reporter.
